AZURE
CLEAN

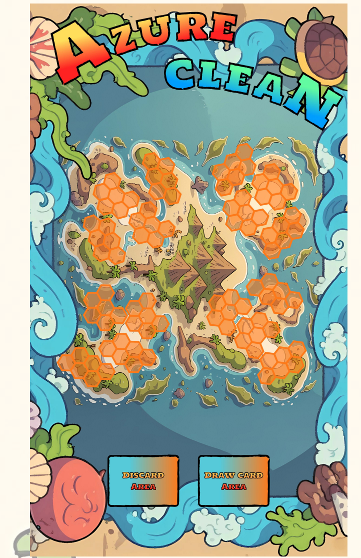
REGULATIONS FOR RECREATION

GAME OVERVIEW

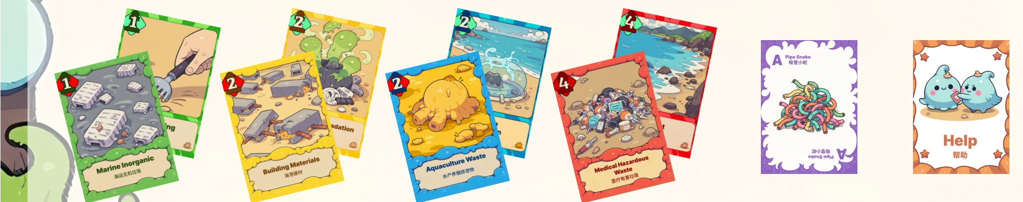
《**AZURE CLEAN**》 is a multiplayer light-strategy board game themed around marine ecological protection. With no fixed factions, all players can freely place field pollution, purify marine areas, disrupt opponents with drifting cards, and strategize with functional card effects. Players gain ecological advantages through deck management, rhythm control, and anticipatory counterplay, and the last remaining marine purifier wins.

Gaming Accessories

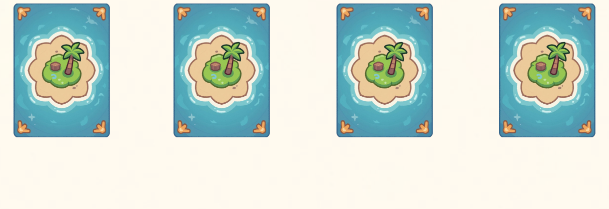
1. Personal Sand Table Board: Each person has an exclusive (2*3)*4 = 24-square beach battle area



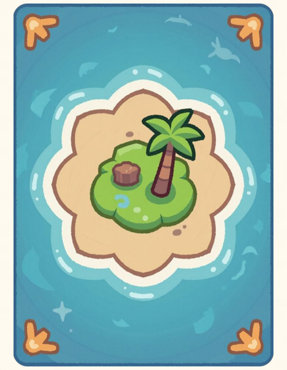
2. 10 Types of Cards



3.Chess pieces representing four different types of pollution



4. Eco Kettle & Capsules



Card Introduction

Contamination & Removal Cards
(Total 62)

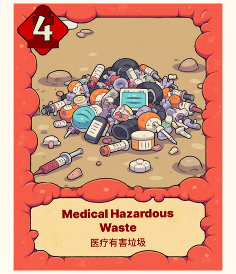
1. Explosive Pollution & Global Equilibrium (Red)

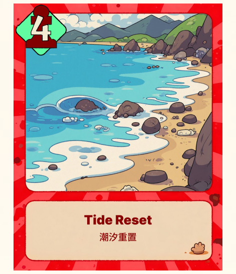
Episodic pollution

Includes: harmful in medical settings, harmful in industrial use
Basic Effect: Choose any opponent and occupy 4 beach spaces on their sandboard
Basic Cleanup: 1 Global Equilibrium Card (Red)
Potent Effect: When 1 of each type of pollution is played simultaneously, all pollution on the field spreads an additional number of spaces equal to double, and spreading-type pollution completes its spread within a single turn
Restrictions on Card Play: Each player may play only one Burst Pollution card in a single turn

Global Equilibrium

Includes: Full-area disinfection and tidal cycle reset
Basic Effect: Removes all Burst Contamination Enhancement buffs on your field. During the discard phase, you may choose to remove one Residual Contamination, one Spread Contamination, and one Burst Contamination from your side
Restrictions on Card Play: Each player may play only one Burst Pollution card in a single turn





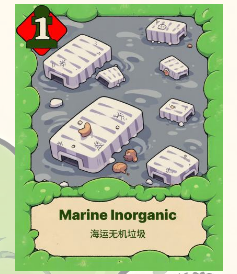
2. Surface-Type Pollution & Quick Purification (Green)

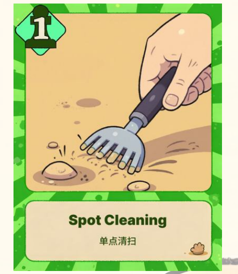
Surface-Type Pollution

Includes: Inorganic maritime waste, inorganic domestic waste, inorganic tourism waste, inorganic aquaculture waste, feed residues, aquaculture residues, household kitchen waste
Basic Effect: Choose any opponent and occupy 1 beach spaces on their sandboard
Basic Cleanup: Use 1 Quick Purification Card (Green) to completely eliminate

Quick Purification

Includes: Targeted cleaning, rapid collection, precise debris removal, ecological maintenance, hard object removal, fixed dredging, deep stripping
Basic Effect: Remove any 1-tile Surface-Type Pollution; 3 cards can remove 2-tile diffusion-type contamination.





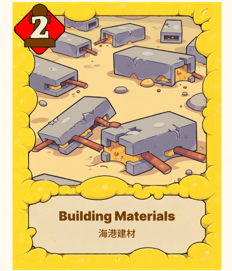
3. Stagnant Pollution & Blocked Purification (Yellow)

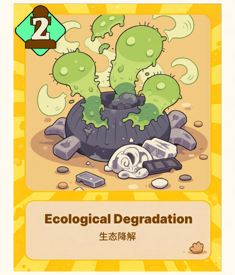
Stagnant Pollution

Includes: Port construction materials, shipbuilding solid waste, offshore food waste, ship-generated hazardous waste
Basic Effect: Choose any opponent and occupy 2 beach spaces on their sandboard
Basic Cleanup: Use 1 Blocked Purification (Yellow) to completely eliminate

Blocked Purification

Includes: Isolation and purification, antibacterial degradation, regional lifting of restrictions, emergency protection
Basic Effect: Remove any 2-tile Stagnant Pollution; 3 cards can remove 2-tile diffusion-type contamination.





4. Diffuse Pollution & Interception and Purification (Blue)

Stagnant Pollution

Includes: Aquatic waste discharge, fuel spills, and animal remains
Basic Effect: Occupies 2 squares of an individual's sandbox empty beach, has the property of automatic spreading, and will continue to spread if not completely cleared, but is limited to a single 2×3 large grid.
